Turning Points in History

Listed below are fifteen major political turning points in modern European history. In each case, identify the implied event, comment on its significance, and then list at least three contemporaneous movements, trends, or activities in literature, science, art, or economics. This brainstorming activity is the first of several reviews to help you develop the skills to put your free-response essays in historical context. For purposes of this activity, define "contemporaneous" as any event in the thirty-year period following dates in the fifteenth through eighteenth centuries, any event within a twenty-year period after nineteenth century dates, and any event within a five-year period following twentieth-century dates.

Art and Architecture: The Visible Landscape of the Past

In this project, you are given brief descriptions of ten time periods you have studied in this course. Using the descriptions as an aid in reviewing the periods, find and photocopy one major example of architecture and at least three pieces of art that capture the spirit of each age. Some eras may require more samples to give total breadth to all the trends of the time. Your task is to create an art book which charts the major trends of modern European history. Divide your project into the periods listed below. Cite the artist, title, style, and date for each work of art or architecture. Be prepared to explain how your selections convey major themes of the period. You may wish to make marginal notes to assist in this process and to aid in your review of the sweep of history through art and architecture.

1. *Middle Ages*: era of feudalism, Universal Church, growth of towns and rising middle class
2. *Renaissance*: the glory of the human mind as celebrated by humanists, depictions of the perfect human form, merchant class emerging as important cultural and political force, beginning of the Age of Discovery, individualism
3. *Reformation*: rise of New Monarchs, entrepreneurs dominated the commercial scene, challenges to the Universal Church, growth of spirituality, new warfare
4. *Late sixteenth and seventeenth centuries*: rise of great monarchs, Dutch merchants created an oligarchy of wealth, Scientific Revolution, Southern Baroque vs. Northern Baroque, Glorious Revolution in England, mercantilism, dynastic struggles
5. *Eighteenth century*: dominant aristocratic culture, patrons dictated art and music, wars for empire and play, Enlightenment, commercial warfare
6. *French Revolution and Napoleon*: Liberty, Equality and Fraternity, Roman Imperial culture
7. *Romantic Period and Nationalism*: search for heroes, interest in the bizarre and the non-European world, impact of industrialism, interest in folk culture, glorification of nations, revolutions
8. *Late nineteenth century*: bourgeois culture, Second Industrial Revolution, era of imperialism, new quest for militarism and power, urban civilization
9. *Period 1919-1939*: impact of Freudian psychology, mindless postwar gaiety, Depression, totalitarian movements, anti-capitalism, democratic movements
10. *Post World War II*: Existentialism, peace movements, Cold War, Communism, anti-nuclear campaigns, environmentalism

Your completed project should provide a valuable resource in reviewing not only the art and architecture of modern Europe, but also the history of the period as well.

The Grand Sweep

Students of modern European history should enjoy a commanding knowledge of the broad strokes of the saga of the West. The ability to use a wide spectrum of information with ease and grace is the mark of an educated person. In this lesson, you will be able to demonstrate to your class and your teacher that you have this capacity. Do not be intimidated by the vast nature of the questions below. Rather attack them with brilliance and insight. In groups, research and prepare a class presentation on a model answer to your assigned question. Your presentation should include a thesis, the aspects to be covered, historical context, nonnegotiable data that must be included, and a conclusion that suggests the importance of your topic and demonstrates your mastery of the issue at hand.

Essay 1

How did each of the following strengthen or weaken the influences of churches in Western society: the formation of the Society of Jesus, the emergence of Deism, and the Kulturkampf?¹

Essay 2

The quest for unity in Europe in the twentieth century is an attempt to turn back the clock. Europe was more united in the fifteenth century than at any time since, more united in the eighteenth century than at present. To what kind of unity does this statement refer, and what explains the weakening of each unifying force?²

Essay 3

What were the similarities and differences between European overseas expansion in the sixteenth century and in the late nineteenth century?³

Essay 4

Examine the impact of war or revolution on the growth of governmental power in *three* of the following instances: France after the Wars of Religion, Brandenburg after the Thirty Years' War, the British Empire after the Seven Years' War, The Austrian Empire after the revolution of 1848-1849, or the Leninist regime after the Russian Revolution.⁴

Essay 5

How did *three* of the four affect the way of thinking during the century indicated: Descartes in the seventeenth century, Newton in the eighteenth century, Darwin in the nineteenth century, or Freud in the twentieth century?⁵

Essay 6

There were a number of factors that delayed the industrialization of Eastern Europe. Discuss them and then compare them with the factors that encouraged the earlier industrialization of Western Europe.⁶
